

Woman Owned SDVOSB

Welcome to At Ease Strategic Communications

At Ease Strategic Communications focuses on serving government organizations; however, our collective experience spans all industries, **from Fortune 500 companies to non-profits**. Because we have such a broad background and understand all types of audiences and branding strategies, we are able to put this knowledge to work for your organization.

At Ease has the staff and talent to offer a wide range of services, including **Web design and implementation, search engine optimization, print advertising, branding and logo development, video and film production, graphic design and much more**. Our breadth of interactive services and our 10-year record of success set us apart from other companies and agencies.

At Ease Strategic Communications has several distinct advantages when completing marketing projects in the government sector:

- ▶ We are owned and managed by a **female disabled veteran** who has **worked for the United States Air Force for 29 years**, and we are registered as a Service Disabled Veteran-Owned Small Business (**SDVOSB**). Our team understands the needs and wants of United States government organizations.
- ▶ We also have some of the **most talented** marketing staff in the print and new media fields of advertising. Our consultants have worked as journalists, Web programmers, brand managers, multimedia designers, and more.
- ▶ We have worked with **famous brands and Fortune 500 companies**, and small, specialized schools. There's no project too large or too small for our company.
- ▶ Although At Ease is new to working with government entities, we have enjoyed worked with numerous world-famous corporations, including Heinz, Verizon, and Volkswagen.

Company services

Your message can make a strong first impression and have a powerful impact. Whether you need a clear, compelling print ad or a search-friendly, seamlessly designed Web site, At Ease is your number-one choice.
